

Environmental Policy

Reverse Vending Corporation is committed to taking a leading role within our industry in minimising the environmental impact from our business activities.

This policy has been structured in line with BS 8555:2003 Environmental Management Systems requirements. It explains our intentions and commitment around improved environmental performance.

Reverse Vending Corporation endeavour to:

- Continuously improve our environmental performance and integrate environmental management procedures and best practice into all our business operations
- Continually monitor and actively reduce the environmental impacts of the company's operations
- Make more effective use of resources, particularly by minimising waste production and increasing the development of markets for the waste and recycling industry
- Develop, implement and promote sustainable procurement options
- Seek ways to minimise energy and water use within day to day operation
- Reduce CO2 emission levels and polluting factors and draw critical links between improving waste management and CO2 reduction
- Utilise telemetry / Internet telephony and VOIP to reduce travel and CO2 emissions
- Adopt and manage waste management procedures, which promote waste minimisation, re-use, recovery and recycling.
- Where these options are unavailable we will ensure that our waste is correctly handled and disposed of in a way that has the least impact on the environment
- Comply with the letter and spirit of all relevant environmental legislation and regulations
- Take into consideration broader environmental impacts in scoping capital projects and partnerships
- Highlight the importance of the organisation's environmental standards and promote environmental best practice within our organisation, to key stakeholders, partners, suppliers and customers

Successful delivery of this policy will incorporate:

- Annual review our environmental policies and performance in line with company operations and objectives and allocate resources for their effective implementation and improvement
- Set and monitor environmental performance objectives and targets
- Reduction of our ecological footprint
- Ensure that our policy is made available for public review if requested

Note : Writing an environmental policy is a voluntary undertaking in the UK, and the structure and content are not regulated under UK legislation. For companies intending to obtain certification to a formal EMS, including ISO14001 and EMAS, the environmental policy is a vital document for implementation
